

CHANDERMANI MISHRA

Full Stack Developer | Python (Django · FastAPI) | MERN Stack

☎ +918607653657 ✉ chandermanimishra91@gmail.com 📍 Bahadurgarh, India

PROFESSIONAL SUMMARY

Software Developer with hands-on experience building and deploying production-ready full-stack web applications using the MERN stack, Python, Django, and FastAPI. Skilled in backend development, RESTful APIs, authentication, database design, and scalable application architecture. Passionate about solving real-world problems through technology; seeking an internship or entry-level Software Developer role in Python or full-stack engineering.

WORK EXPERIENCES

Software Developer Intern | Internship Jun 2026 - Present
Beritrave Technology Pvt Ltd On-site • Bahadurgarh, Haryana

- Building **Aana Jana**, a ride-booking platform (Uber-style) using **React.js** and **FastAPI**.
- Developing frontend booking flows and backend APIs for real-time ride requests and matching.

Technologies / Skills Used : React.js, FastAPI

Full Stack Developer Intern | Internship Jun 2025 - Sep 2025
Unified Mentor Remote • Remote

- Built **5+** responsive web apps with **React.js**, cutting page load time by **30%** through component optimisation.
- Created a reusable **20+** component React library, reducing UI development time by **35%**.
- Built **RESTful services (Node.js/Express)** integrating MongoDB and Firebase for real-time data.

Technologies / Skills Used : React.js, Node.js, Express, MongoDB, Firebase

EDUCATIONS

Jagannath University | Haryana 2023 - May 2027
B.Tech in Computer Science Engineering

A.F.C Senior Sec. School | Sampla, Rohtak 2023 - 2023
Senior Secondary

PROJECTS

AI-Powered UGC–AICTE Compliance Verification System 2025 - Present
SIH 2025 Winning Project

- Built an **AI-powered compliance platform** across **4** portals (Institution, UGC, AICTE, Super Admin), eliminating manual review for **80%+** of submissions.
- Designed microservices-based **RESTful APIs (Node.js/Express)** managing **10,000+** compliance records in MongoDB with real-time tracking.
- Automated document inspection (**95%+** accuracy) using **Python, OpenCV**, and **YOLO**.
- Built real-time analytics dashboards for compliance insights across all portals.

Technologies / Tools Used : React.js, Node.js, Express, MongoDB, Python, OpenCV, YOLO

LingoLive — Real-Time Voice/Video Conversation Platform | 📞

- Built a peer-to-peer platform (**WebRTC + WebSocket**) supporting **100+** concurrent sessions at sub-**150ms** latency.
- Developed a custom **Node.js** signalling server, cutting connection setup time by **40%** vs relay-based alternatives.
- Used **MongoDB** to persist session state and call history reliably.

Technologies / Tools Used : React.js, Node.js, Express, WebRTC, WebSocket, MongoDB

Clinic Management System | 📞

- Built a full-stack clinic platform for patient records, appointments, and billing with role-based access for **2** user roles.
- Used **Redux** and **Firebase** for global state and real-time sync across concurrent users.

Technologies / Tools Used : React.js, TailwindCSS, Redux, Firebase

SKILLS

Databases :	MongoDB, MySQL
Frameworks & Libraries :	React.js, TailwindCSS, Node.js, Express, Django, .NET
Programming Languages :	JavaScript, Python
Tools & Platforms :	Git, GitHub, Docker, AWS

AWARDS & ACHIEVEMENTS

- **National Level Winner**, competed against **1,000+** teams nationwide.
- **150+** LeetCode problems solved across Easy, Medium, and Hard difficulty, with focus on Arrays, Trees, Graphs, and Dynamic Programming.
- **2** production-deployed projects, including a live WebRTC platform (LingoLive) and a Netlify-hosted clinic management system.
